

Novara GeoSolutions

Creating, managing and sharing information so you make safe and informed decisions.

Who we are

Managing your assets efficiently, cost-effectively, and accurately

Novara GeoSolutions, a CHA Company (Novara), is a market-leading geospatial software and services company and a key partner of Esri, the world's leading GIS provider. For 20 years, Novara has specialized in the design, development and application of geospatial solutions that mesh geography, data and analysis to produce useful information for our clients. Novara engineers easy to use solutions that address multifaceted problems. Ultimately, these solutions create organizational efficiency and empower our clients. Novara prides itself on being relationship-focused, dedicated and determined to find successful solutions for even the most complex scenarios.

Novara GeoSolutions began as a small, dedicated, engineering group called Coler & Colantonio. In 2014, the company was purchased by CHA Companies and subsequently changed its name. CHA Companies is a multi-faceted, global professional services firm that is one of America's largest engineering companies. Today, Novara GeoSolutions is backed by more than 1,000 experienced staff, located all over the United States, who are experts in Gas Distribution, Transmission Pipelines, Transportation, Railways, Water and Wastewater Systems, Construction, Aviation, Sport Facilities, and private Institutions.

The Novara GeoSolutions team is dedicated, progressive and a creative group of thought leaders who have visions of where and how you can stretch your GIS and asset data to the next level.

What you need

Preparing for today and tomorrow

Your company needs to manage assets efficiently, cost effectively and accurately today, not tomorrow. Whether you are just beginning or already have a complex system, Novara GeoSolutions has developed dynamic geospatial solutions and services that will empower you and your team and ensure data accuracy. Each solution is built around current compliance regulations, field safety measures and your organization's internal needs. We utilize web-based maps, dashboards, desktop applications and mobile field solutions to give each level of management visibility into the asset data so you can make informed decisions.

In addition, our team of subject matter experts can demonstrate how our technology can be applied to a wide range of workflows such as DOT compliance, engineering design, asset management, right-of-way management, and mobile workforce computing. As an innovative customer-focused company, Novara GeoSolutions partners with your company so you can make better decisions, increase business efficiency, save costs and improve internal communication. Our goal is for you to do more with less.

We have expertise in many areas and know how to:

Share and access information

Create a Traceable Verifiable Complete data set

Efficiently comply with regulations

Efficiently keep content current

Answer critical questions around maintenance and operations

Solve problems related to damage prevention

Refine and improve processes

The impact

Leaving a legacy of safety

Whether you need a new GIS or already have an advanced GIS platform, Novara GeoSolutions can quickly and efficiently partner with you to deliver on your needs. Our solutions allow you to take complex spatial data, simplify the output and make it understandable to general users. We automate tasks so your job is easier. Our goal is for you to manage your assets efficiently, cost-effectively, and accurately. Executives will view critical metrics, identify trends and devise new management strategies. Managers and Supervisors will be empowered to assign, track, forecast and pull reports. Importantly, your field crews will use easy to use mobile solutions and have numerous support tools.

Benefits to a Novara Solution

- Create transparency throughout the entire organization.
- Empower office teams and field resources.
- Seamlessly, manage the full lifecycle of assets.
- Our software toolset are based on Esri technology.

What we offer

Making difficult decisions easier

Novara GeoSolutions is proud to support you with a lengthy list of solutions and services to ensure all of your needs are met and structured in such a way that you are meeting your safety and compliance goals.

Software Solutions

- Infrastructure/Asset Management
- Compliance Management
- Field Solutions
- Geospatial (GIS) Solutions
- DIMP
- ERP (i.e. SAP) Integration
- Custom Application Development
- Mapping and Alignment Sheet Generation
- Enterprise GIS Implementations

Technology Services

- Asset Management Strategy & Planning
- Software Implementation
- Regulatory Compliance Assistance
- IT Hosting/Outsourcing Support Services
- Esri Platform Services: geometric networks, field data collection forms, Portal setup and dashboards
- Geoprocessing

Engineering & Field Services

- Leak Survey
- Field Data Collection
- Track & Trace
- Design and As-built
- Class Location Studies
- Compliance Training
- Class & HCA Analysis
- Public Awareness

Regulatory Compliance Services

- Class Location Studies
- Compliance Training
- HCA Analysis & Management
- DIMP
- MAOP/MOP Validation
- Regulatory Reporting
- Integrity Management Programs
- Leak Survey

Data/Data Services

- Database Implementation and Customization
- PODS and Geodatabases Services
- Data Migration, Maintenance, Validation and Analysis
- Digital and Paper Data Conversion

How you can connect

Informed decisions come from the ability to access accurate data.

There are a number of ways to reach out to Novara GeoSolutions. To learn more about us, visit our website at www.novarageo.com. From there you can subscribe to our newsletter or register for a free webinar.
