

Corrivo

ASSIGN, MONITOR, AND MANAGE YOUR COMPLIANCE, ROUTINE O&M OPERATIONS AND OTHER FIELD WORK...QUICKLY, EASILY AND EFFICIENTLY!

ELIMINATE PAPERWORK

IMPROVE FIELD ACTIVITIES

STREAMLINE WORKFLOWS

Corrivo helps gas utilities successfully execute leak surveys in a defensible and trackable manner, plus improve data quality assurance through error reduction.

Novara GeoSolutions' (Novara) solution allows users to manage and assign work, complete leak surveys, and view program performance. From office to field, this solution ensures users can easily schedule surveys and access, collect, report and map data. Corrivo has a low learning curve and updated interface that makes it simple to use in the office and field. Using an easy to understand map, field crews can capture and record field observations in real-time and then quickly and easily sync to the system of record. Plus, using a simple yet powerful management portal, executives can quickly assess the state of their organization or program and use the information to make safe, informed decisions with real-time data. If needed, it can be easily integrated with an existing work management system, as well as your detection equipment, so you only have to use one system.

Corrivo

Traceable, verifiable, and complete

Capture the regulatory information needed to protect the organization in case of an event. This solution gives users control to prioritize surveys and report on their process, and it enables support for all field operations, maintenance and 49 CFR Part 192 compliance work. This customizable solution allows for quick assigning and reassigning of crews and the review of data. By eliminating paperwork, users often see data improvements and increased productivity with this automated system. It also reduces overall project costs by ensuring surveys are 100% complete.

Identify trends and devise new management strategies

The management portal is a web-based application that allows an organization's leader to see exactly what is happening inside the organization to make informed and actionable decisions. Executives can proactively view critical metrics, identify trends, and devise new management strategies. Through this, supervisors and executives can see leak survey program statistics, track field personnel, or individual leaks, and monitor day to day activities. The views are fully customizable so that executives can focus on what is important to them.

Eliminate resource constraints

Novara offers a wide range of services, including spatial analysis and mapping services, GPS field data collection, alignment sheet generation, geospatial database design and implementation, data loading and validation, regulatory consulting, web-based GIS application development, and more. Novara can be an extension of your team so you can get projects completed quickly!

GAIN CRITICAL INSIGHT INTO FIELD ACTIVITIES AND ELIMINATE PAPERWORK.

Consistent and high-quality data from the field

Eliminate paperwork and empower field crews to capture data in a way that makes sense to them! All the information is right in front of them on this Esri-based field solution, which makes taking paper into the field obsolete. Field crew performance will improve because work is clearly listed and forms walk them through what information they need to collect. They can sort assignments by date or volume of work and drop pins for leak indications.

Increase your ROI by maximizing your existing systems

With Corrivo, there is one fluid process that integrates with your ERP/EAM, WMIS, MMS, CIS/COS, GIS, and EDMS systems. This solution simplifies the workflow and works with your existing systems, so you get the most out of your investments. It features a seamless two-way interaction between the field and corporate back-office systems of record.

ADVANTAGES

- > Integrate with existing work management systems
- > Quickly assign and complete Leak Surveys
- > Extendable to capture other data
- > Attach and annotate photos
- > Analysis of field productivity
- > Work in connected and disconnected modes
- > Interactive mapping
- > GPS integration and breadcrumb trailing
- > Integrated mobile solutions
- > Reporting through tabular reports
- > Easily track billable items

IMPROVE SAFETY RATINGS AND DECISIONS BY INCORPORATING CORRIVO INTO YOUR WORKFLOW!
